**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --****Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

**DETAILED ACTION**

1. Applicant's cooperation is requested in correcting any error of which applicant may become aware in the specification.

***Information Disclosure Statement***

2. The information disclosure statement submitted on 05/17/2004, has been considered by the examiner and made of record. See attached form PTO-1449.

***Drawings***

3. The drawings were received on 06/22/2004. These drawings are  
ACCEPTED.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 12, and 17-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Mihich (4,953,932).

The Mihich reference discloses in figures 1, 2, and 4, an optical coupling apparatus (15) for optically coupling a first, rotationally moveable optical

component (14) with a second, non-rotating optical component (12) to enable an optical signal to be transmitted between said first and second optical components, said apparatus comprising:

- a first annular member (26) for supporting an outer most end of said first optical component in at least a partial circular arrangement;
- a second annular member (22) for supporting an outer most end of said second optical component in at least a partial circular arrangement, said first and second annular members being longitudinally aligned with one another along a longitudinal axis; and
- wherein a face portion of each of said annular members are placed in facing relationship to enable said first, rotationally moveable optical component to be optically coupled to said second non-rotating optical component without physical contact there between, since has air gap (72). See figures 1, 2, and 4, and abstract.

With regard to claims 1, 12, and 17-20, the Mihich reference discloses all the claimed invention.

***Allowable Subject Matter***

**5. Claims 2-5, and 13-16 are objected** to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

**Claims 6-11 are allowed.** The claims are allowable over prior art of record, because the Mihich reference does not disclose the an optical coupling apparatus comprising a motor having an output shaft operatively coupled to the first annular member for rotating the first annular member relative to the second annular member.
